

BuJo

- Task incomplete
- x Task complete
- > Task Migrated into collection
- < Task scheduled into Future Log
- ~~Task irrelevant~~
- o Event
- Notes
- * Priority
- ! inspiration

Cool stuff

Nesting

o Event A

- get this from here
- pick up stuff

could be executed by using a tab
(on computer / web-based)

Layout

- Index
 - Future log (review each month → move task to monthly)
 - Monthly Log
 - Calendar page
 - Task page: priorities for the month
- idea: auto filled & hyper link

- Daily
 - Date (of. c)
- Best to create the night before

(• Other custom log for migration:
ex: shopping list, lecture notes, idea,
diary, sketch,)

Problems with BuJo :

1)* Should * do it daily, ideally.
Why is this a problem? It's difficult
for people who just start using BuJo
to get used to this a little bit of
overwhelming system & force it into a
daily habit

How to fix this?

- Daily: we can send a daily
reminder (not sure how to do that on
web-based)
- Getting start: we can have tutorial
& daily guidance (with on/off option)

2) It's more of a task management than a note-taking platform (the creator is a designer though, so the app & website look really nice). But BuTo has a very down-to-Earth & clean layout rather than beautiful/colorful note-taking design that you usually see

=> users might expect different things

How to bridge the gap between reality of BuTo & customer's expectation? (while still keep our product aesthetically pleasing)

Open to discuss

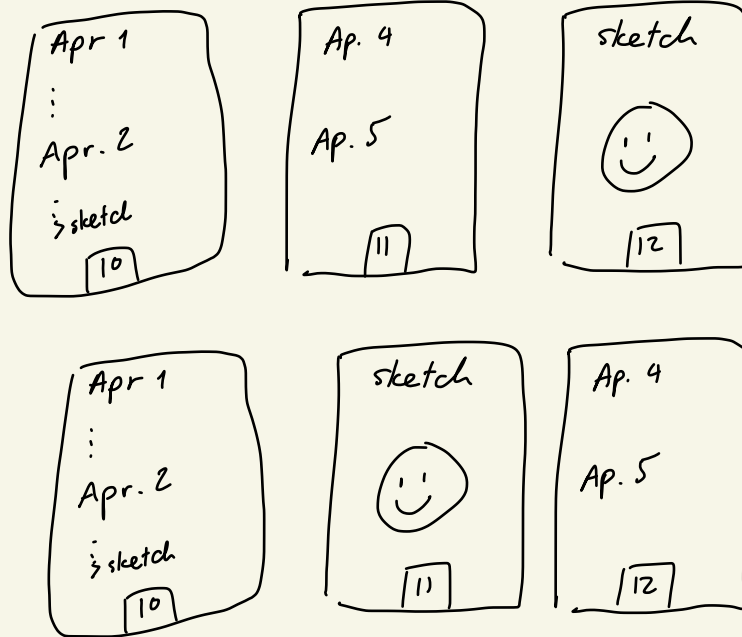

3) Instant checking / access
People like the feeling of keeping themselves on top.

App-based seems to be more suitable accessible than web-based

Cool feature I think BuJo could have: (Pros/Cons)

- Hyperlink for navigation
 - | from (& back to) index
 - | from task → collection
- Look up / search
- Move the location of the page :

ex :

Question : Do we even need page number ?

- Page should be fixed length ???
- Light / Dark Mode 🌙
- Save on Cloud ? or somewhere ?

- If a task/note too long (20+ words) then suggest users to put it into a collection (Could be useful for BuJo beginners)
